

Technical Bulletin
1534
Adhesion Promoter
UV Curable Screenprinting Inks

The #1534 Adhesion promoter is used to promote superior adhesion to some of the more difficult substrates and also promotes water resistance. It is particular helpful in achieving adhesion to glass and most poly type substrates that may have not been properly treated.

The #1534 will work with all Polymeric Imaging UV inks; there will be variances in shelf life of the different types of inks manufactured by Polymeric Imaging. The typical shelf life is usually 6-8 hours.

APPLICATION:

<i>Mixing:</i>	The #1534 is to be added at 1% -3% by weight.
<i>Mesh:</i>	305-380 depending on type of ink and application
<i>Squeegee:</i>	80 Durometer
<i>Cure Parameters:</i>	See Tech Bulletin on particular ink series
<i>Coverage:</i>	See Tech Bulletin on particular ink series

** Please pretest this product to insure its suitability for the intended application. Polymeric does not offer a warranty with this specialty product.*
