### ShurFoot \*PATENT PENDING

Printable, Anti-slip  
Floor Graphic Coating

ShurFoot is an anti-slip floor graphic coating that has been specifically designed for both commercial and industrial applications. This coating is intended for use with all approved floor graphic vinyl base films. It is a UV screen printable coating that when printed last down eliminates costly anti-slip floor graphic laminating films and does away with the slow laminating process.

ShurFoot is a non-glare, satin coating that provides excellent contact clarity while providing a safe aesthetic look. ShurFoot is compatible with most inkjet ink systems and can be used with both solvent and UV based screen printing inks. ShurFoot provides excellent footing even in the most inclement conditions. ShurFoot\* can also be used for counter mats, mouse pads or menu graphics applications as well.

- Excellent indoor and outdoor durability
- Superb water and abrasion resistance
- Unmatched adhesion with excellent UV, solvent and chemical resistance
- Extremely flexible for finishing processes
- Non-Glare surface enhances graphics and viewing aesthetics

#### APPLICATION:

<b>Mixing:</b>	SureFoot is supplied at print-ready viscosity and can be used directly from the container. Thinning with 1004 Universal Thinner, if desired, should not exceed 10%. Mix well before using.
<b>Mesh:</b>	80 - 110 (31-43cm) plain weave
<b>Squeegee:</b>	70 - 80 durometer polyurethane blade
<b>Cure Parameters:</b>	1-300 watt per inch medium pressure mercury vapor lamp with 150-180 mjs minimal output
<b>Belt Speed:</b>	40 - 60 feet per minute depending on lamp efficiency and heat emission
<b>Coverage:</b>	600 – 800 square feet per gallon

*Due to the nature of the materials and inks it is critical to pretest this product on each individual lot to insure the suitability of the product for its intended use.*

*Effective 04/29/05*
